

## Washing Instructions Tips and Care

### General Instructions:

- You have made a good choice in buying your wig or hairpiece. Our wigs and hairpieces have a natural look and are comfortable to wear.
- Shake the wig or hairpiece before wearing.
- Do not brush curly styles. Use fingers to pick through the curls to loosen and add volume.
- Brush straighter styles gently, using a brush with widely spaced, single bristles (do not use a regular hair brush).

### Cleaning and Care:

- Put special wig shampoo in cool water (never use hot water).
- Gently swish the wig or hairpiece in the solution and let it soak for a while. Do not rub or wring. Gently squeeze the water from the piece.
- Rinse in clean, cool water. Gently squeeze the water from the piece and rinse again, if necessary.
- Final Treatment with balsam:  
Put a little special balsam in cool water and soak your wig or hairpiece in this emulsion for approximately 5 minutes. Gently squeeze out the water.  
Do not rinse. The balsam restores softness to the fibre of the hair and gives it a natural brightness.
- Wrap the wig or hairpiece loosely in a towel to absorb excess water.
- Lay wig or hairpiece flat on a towel and allow it to dry naturally.

### Please be careful:

- Avoid heat and steam (oven, grill, hair-dryer, sauna, etc.).
- Do not brush wigs and hair pieces when they are wet.
